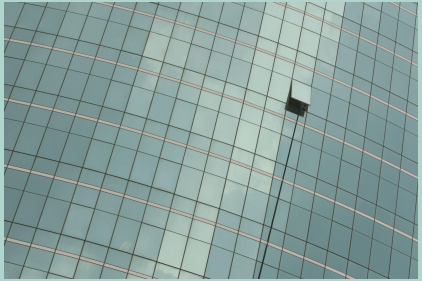
Limitations

5
Group Ideas

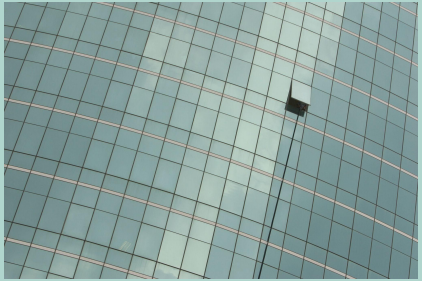


THE BUSINESS SITUATION

- Organizations analyze media trends to understand public discourse and risk sentiment.
- Historical news headlines exist primarily as unstructured web content.
- A structured dataset enables great expectations of media analysis.

Why it Matters

- Organizations analyze media trends to understand public discourse and risk sentiment.
- Historical news headlines exist primarily as unstructured web content.
- A structured dataset enables great expectations of media analysis.

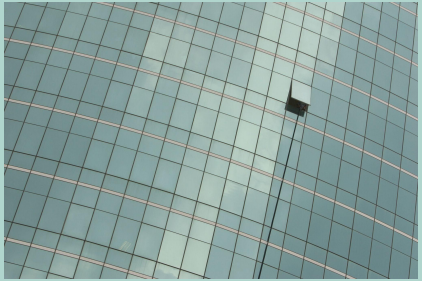


Data Sources

- Organizations analyze media trends to understand public discourse and risk sentiment.
- Historical news headlines exist primarily as unstructured web content.
- Timestamps
- Emotion classification using NLP models.
- HuggingFace transformer models.
- Optional enrichment with market or event datasets.

Limitations

- Legacy HTML structures.
- Duplicate headlines.
- Incremental ingestion.
- API rate limits.
- Data quality validation.
- Systems Architecture
- Between the chair and the keyboard



Group Ideas

- Decision making on what the bigger questions could mean to us as individuals.
- Ingestion: scraping & scheduling.
- Processing: normalization.
- Data Quality: validation.
- Enrichment: NLP scoring.
- Analytics: dashboards.

Thank you
